Download

Hope I'll be lucky today. :D In fact, I've tested all SDHC memory card that works with R4i-SDHC, both NTSC and PAL, including 1GB SDHC. It works for me. I'm guessing this is the same firmware that works with other cheap SDHC memory card out there. So yeah, I'm on to the ISO 4 speed videos. =P But then, I've found a PAL DVD ISO only for 716MB, and it works.

So, I'm watching it now while I'm preparing for the class later. I hope it will work for everyone on R4i-SDHC. I'll upload a firmware file with the info of the ISO video when I've tested it. Edit: Well, it works. So I'll just put the R4i-SDHC as it is. =D It's the second time that it works on my R4i-SDHC, the first time being with the PS3 ISO 4 speed DVD. Thanks for those who helped me out. So yeah, it's fixed now. =D I've uploaded a firmware for the R4i-SDHC. It's the 2nd firmware that will also work on the R4i-SDHC. It is based on firmware version 1.4.2, which I found a couple of days ago from somewhere on the Internet. The one that is based on firmware version 1.4.3 does not work with the R4i-SDHC. I'll give some advices to those who

are running R4i-SDHC with firmware version 1.4.2. The most common problem I can found is the R4i-SDHC is unable to read certain type of Sony SDHC memory card. Here is the list of these memory cards: SDCNP (Swedish specification) SDCNS (Swedish specification) SDCN (Swedish specification) SDCNE (Swedish specification) SDCNF (Swedish specification) SDCNK (Swedish specification) MMCF (Micro SD card format) SDCNV (Swedish specification) MMCM (MMC-MMC) The newest PS3 OS is 2.50, but the firmware versions for R4i-SDHC is 1.4.2. 82157476af
